

Change Notice

FM Series

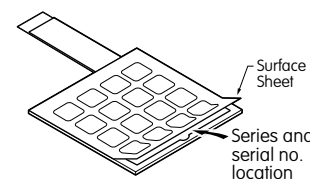

Change to Identification of FM Series Membranes

Type of Change:

- ☐ Engineering ☐ Part Number
☐ Product ☒ Appearance

There will be a change to the identification of FM Series Membranes. However, the change is not visible on the top of the membrane card, but under the surface sheet. A serial number will be added to the right of the "FM" at the bottom center, as shown in **After Change**. The revision will apply to illuminated and nonilluminated membranes, as well as standard and custom models. The effected standard part numbers are listed on the table below.

Note that the FM identification and the new serial number appear **under** the surface sheet, as shown in the illustration at the right. Graphics shown below are for location of identification purposes on the surface under the top sheet.

FM Series Membranes Example: FMBP12BF	Before Change	After Change
	<p>Diagram of a 12-button membrane switch (1-9, *, 0, #) with two green indicator lights. The text 'FM Series Identification (under sheet)' points to the 'FM' label at the bottom center.</p>	<p>Diagram of the same membrane switch. The text 'Serial Number (under sheet)' points to a new serial number field at the bottom center, next to the 'FM' label.</p>

Notes

There are no changes to the membranes' dimensions or specifications.
Contact information is below if more details are needed.

Effected Standard Part Numbers for FM Series Membranes				
Nonilluminated	FMBN04BD	FMBN16BD	Illuminated	FMBP12BF
	FMBN04BE	FMBN16BE		FMBP16BF

Effective Date

Changes to identification on FM Series Membranes will be effective December 2025.
However, the date may be subject to change depending on inventory of the products.
